
Pension Services Health Check

LPP

Local Pensions Partnership

LPP's Pension Services Health Check goes beyond an in-depth analysis of your data to consider your systems and processes as well.

What the health check offers

The health check is unobtrusive and will utilise very little of your in-house resource.

Our approach uses customised reporting tools, data analysis techniques and one-to-one discussions with your staff members, who know your scheme and operations inside and out.

Following a detailed examination of your data and administration processes, we'll provide you with an in-depth, evidence-based, confidential assessment of your pension administration function's health, together with recommendations for improvement.

This includes:

- **State of Data Analysis Report**, providing a data score against common and scheme-specific data and giving you simple Red, Amber, Green (RAG) indicators on other varying aspects of your data.
 - **Process Improvement Plan**, showing you which aspects of your current processes could be changed and how, and the improvements the changes will deliver.
 - **Health Check Overview**, summarising the issues detailed in the Process Improvement Plan and the State of Data Analysis, plus the input from your staff.
-

About Local Pensions Partnership Ltd

LPP is a well-established pension scheme administrator in the public sector, servicing the pensions of around 590,000 members across nine Local Government pension schemes (LGPS), involving multiple employers, seven Fire schemes and one Police Scheme.

We help our clients and their members prepare financially for the years ahead, with our end-to-end pension services partnership covering Pension Administration, Asset and Liability Risk Management (ALM) and Investment Management and Advisory services. With sector-leading governance, a not-for-profit philosophy and client service at the core of our offer, our clients benefit from our active long-term stewardship of both assets, and risk and liabilities.
